Community-led recovery

 April 8, 2020  2pm AEST

GUEST SPEAKERS

Louise Mitchell – Social Recovery Reference Group | Margaret Darveniza – Townsville City Council

First presenter: Louise Mitchell

Louise Mitchell is National Consultant Disaster Recovery to the Social Recovery Reference Group. Louise supports the organisations who are members of the Social Recovery Reference Group across Australia as they collaborate to continue to grow human and social recovery and preparedness capability. This group shares policy and practice and advocates for the centrality of both individuals and community to successful recovery.

Prior to this role Louise worked at the Australian Emergency Management Institute for 16 years with a focus on adult education, and developing and facilitating workshops to continue to progress emergency management. She keenly explores how individuals can participate in civic life both within and outside the disaster context and how strengths based and collaborative approaches can both build relationships and get some of the best outcomes.

AUSTRALIA

- understand the context
- recognise *complexity*
- use *community*-led approaches
- *coordinate* all activities
- *communicate* effectively
- acknowledge and build *capacity*

NATIONAL PRINCIPLES FOR

Disaster Recovery

DISASTER RECOVERY

is part of emergency management, which includes the broader components of prevention, preparedness and response. Planning for recovery is integral to emergency preparation and mitigation actions may often be initiated as part of recovery.

DISASTER RECOVERY

includes built, environmental and economic elements, as well as social wellbeing. Recovery can provide an opportunity to improve these aspects beyond previous conditions, by enhancing social and natural environments, infrastructure and economies – contributing to a more resilient community.

SUCCESSFUL RECOVERY

Understand the **context**

Successful recovery is based on an understanding of the community context, with each community having its own history, values and dynamics.

Recognise **complexity**

Successful recovery is responsive to the complex and dynamic nature of both emergencies and the community.

Use **community-led** approaches

Successful recovery is community-centred, responsive and flexible, engaging with community and supporting them to move forward.

Coordinate all activities

Successful recovery requires a planned, coordinated and adaptive approach, between community and partner agencies, based on continuing assessment of impacts and needs.

Communicate effectively

Successful recovery is built on effective communication between the affected community and other partners.

Recognise and build **capacity**

Successful recovery recognises, supports and builds on individual, community and organisational capacity and resilience.

How can governments
support **community-led recovery**
and maintain coordination?

Government's role in supporting community-led approaches to recovery

Literature Review

Governance is more than government. It is about making social choices and raises the question: How should key actors in government work together with key actors in the private sector and civil society to resolve societal problems?... What constitutes appropriate modalities of recovery governance will vary from place to place. The challenge is to construct an architecture of recovery governance that engages and empowers those in recovery; this is a monumental but crucial challenge for all in pressure cooker situations.

Glavovic, 2014

Government's role in community-led approach

SHARED GOALS

*Adapted from CONN (2011)

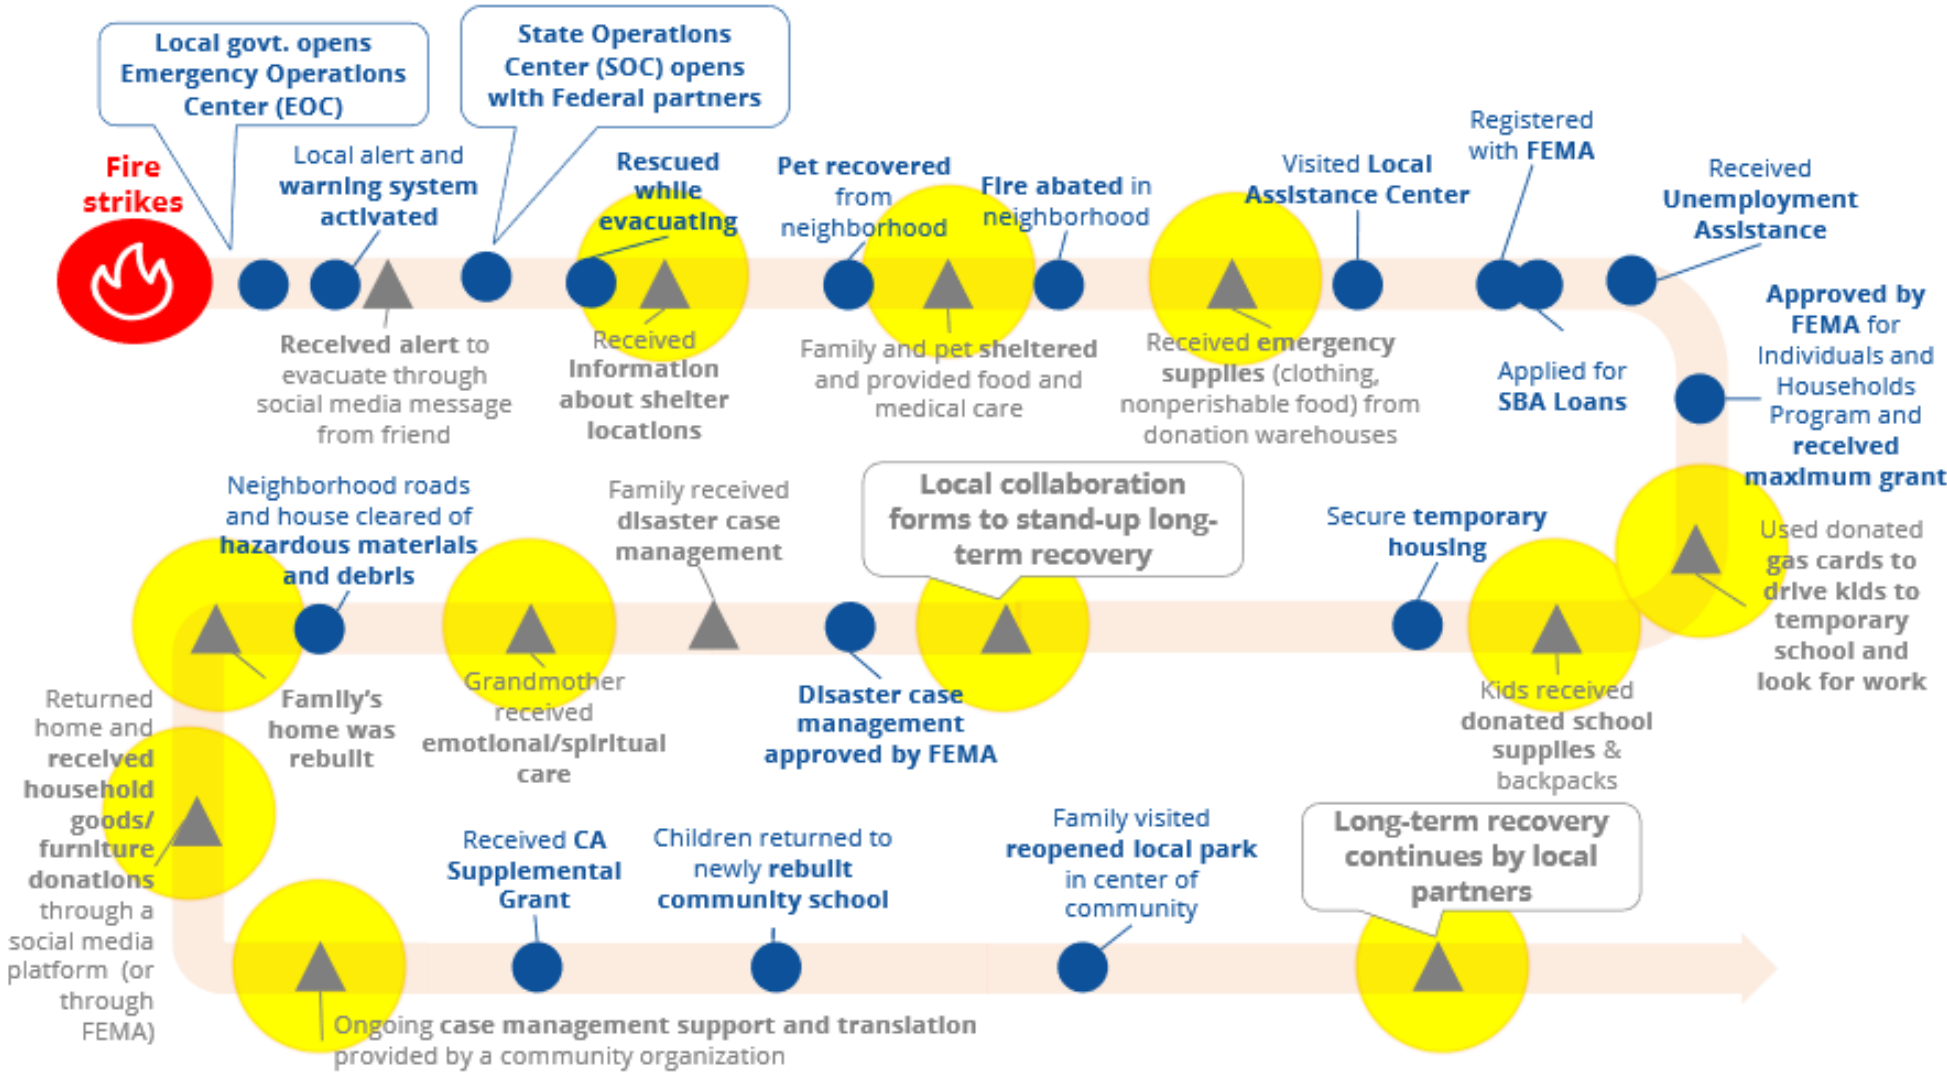

PATH TO RECOVERY

Disaster response and recovery is a whole community affair

Looking at the experience of a single family helps bring to life the critical role that nonprofits, CBOs, faith communities & private-sector organizations play alongside government in a disaster scenario*

Key: ● Role for Volunteers & Donations ● Govt. support ▲ Non-govt. support

Social Recovery Reference Group AUSTRALIA

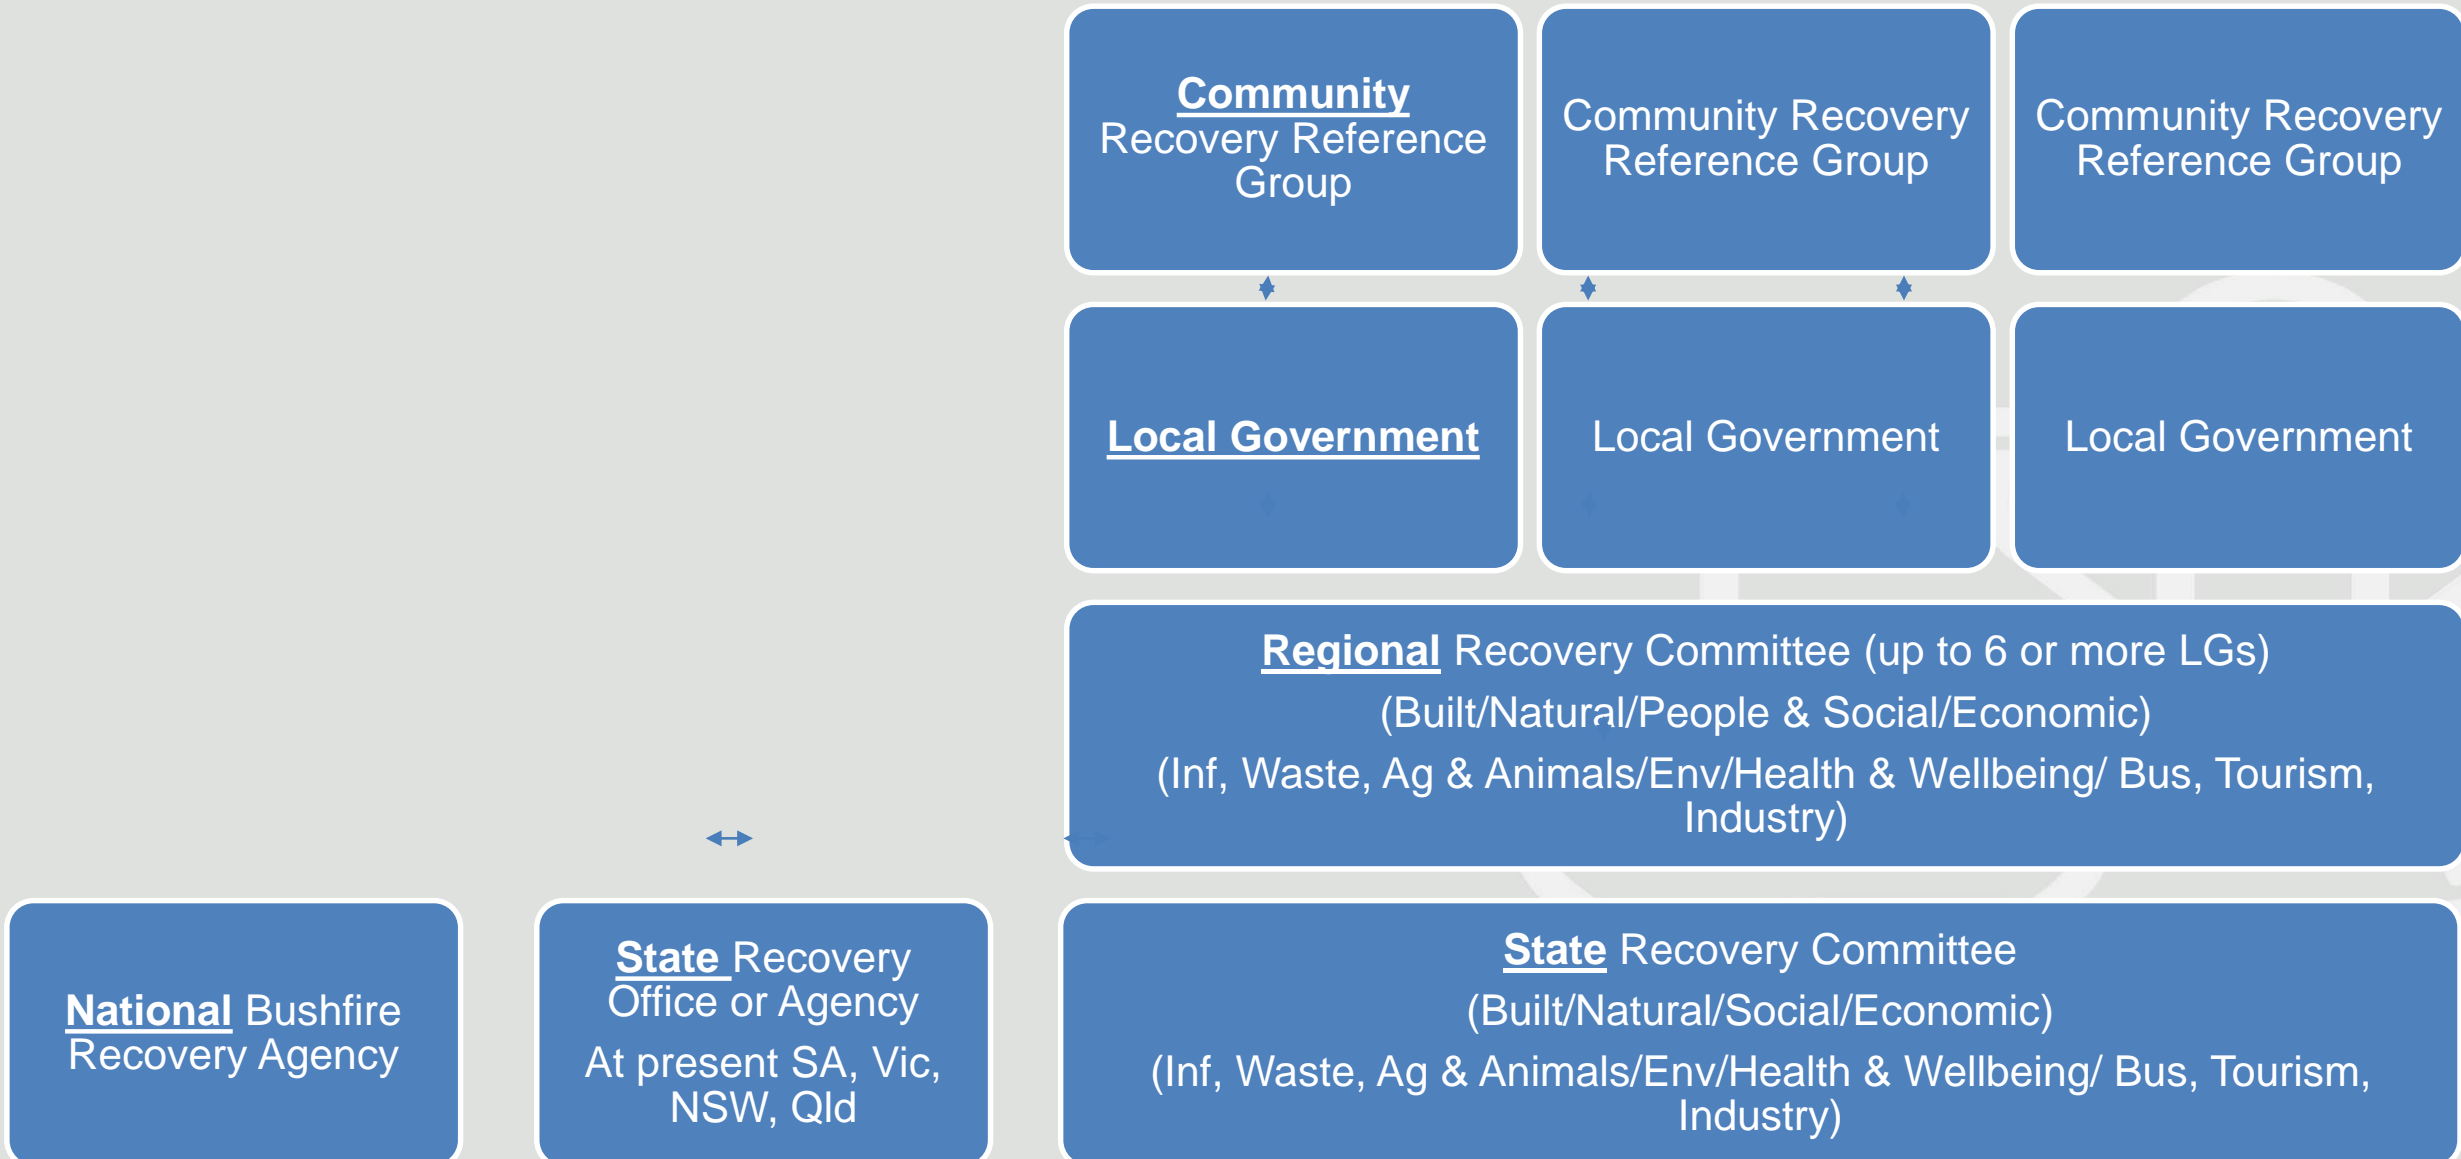

Note: *All events are based on real examples. Events can occur earlier or later depending on the disaster, location, and circumstance. This sequence presumes a Presidential declaration of disaster that invokes FEMA resources. Building Disaster Resiliency 7

Coordination and Governance

Case Studies – SRRG Project

Social Recovery
Reference Group
AUSTRALIA

Naiyu - Evacuation Centre Cultural Safety – Growth Learning Mindset and strong Community/agency relationships

Ravenshoe - Appeal Committee – good governance involving local voices (clear roles for protection)

Sherwood - Community leadership and government invited in by Community

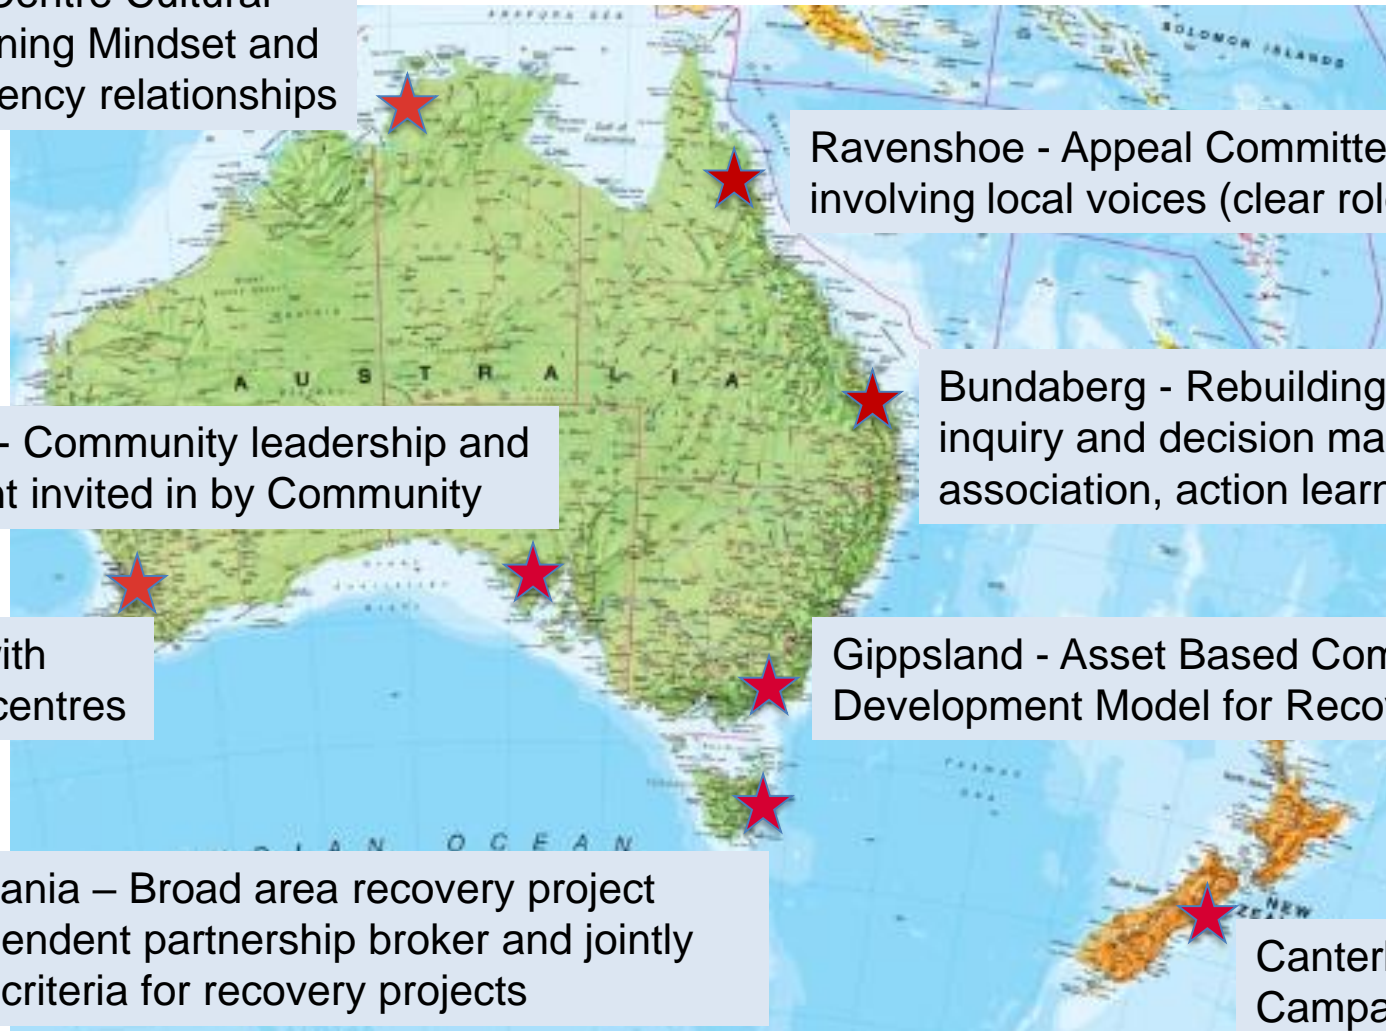

Bundaberg - Rebuilding houses – Collective inquiry and decision making, community driven association, action learning

Yarloop - Collaboration with place based community centres

Gippsland - Asset Based Community Development Model for Recovery

East Coast Tasmania – Broad area recovery project decisions - Independent partnership broker and jointly vertically agreed criteria for recovery projects

Canterbury – Public Health Campaign - Funding, collaboration, innovation

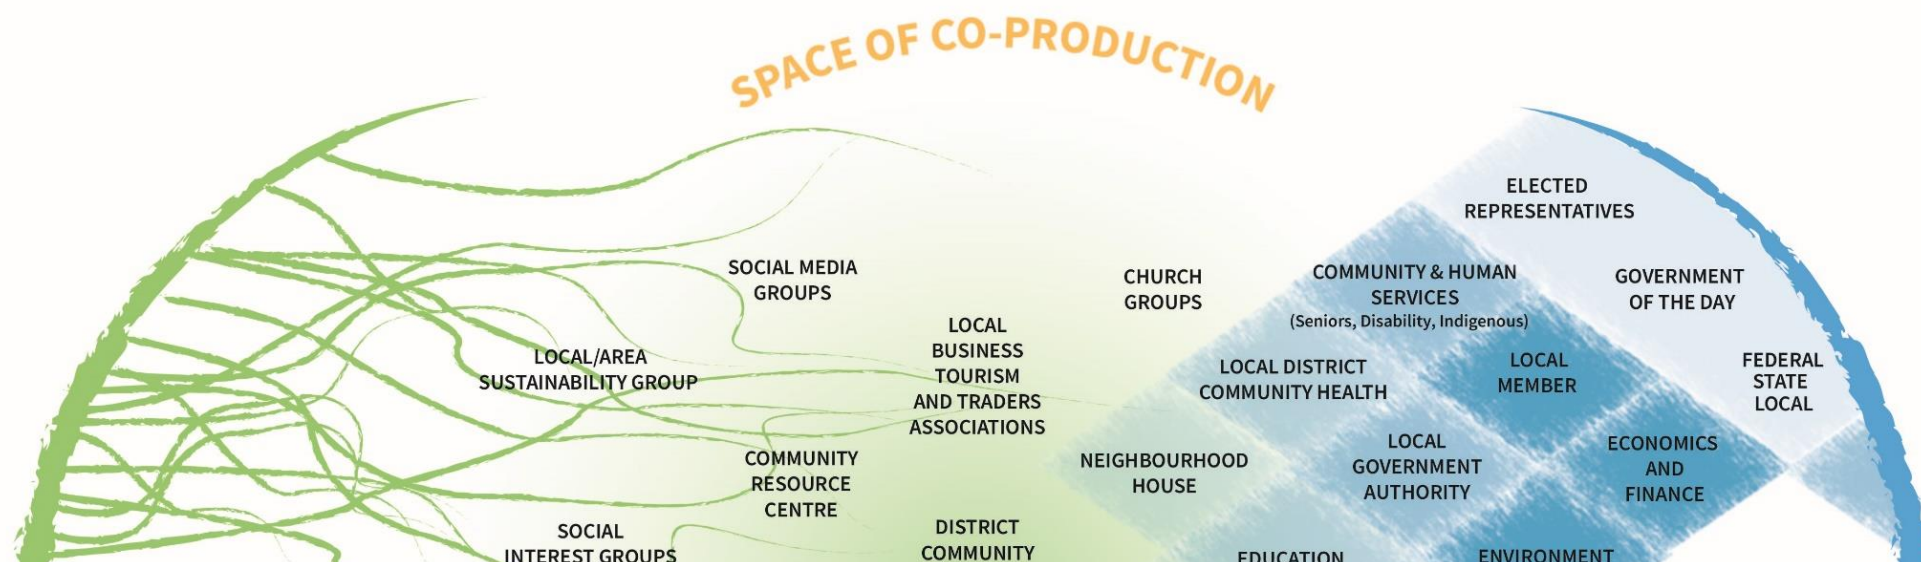

GOVERNMENT SUPPORTING COMMUNITY-LED AND COORDINATED RECOVERY

GOAL : Communities that can determine their own needs and shape their own future throughout their recovery (including preparing for recovery).

SUCCESS LOOKS LIKE: 1. Support for attunement & responsiveness to what the community defines as success their desired outcomes and values.
2. Jointly mitigating the risk to the health and well-being of individuals, families and communities.
3. Supporting communities towards sustainability and resilience.

GOVERNMENTS AND PARTNERS TASK IS TO:

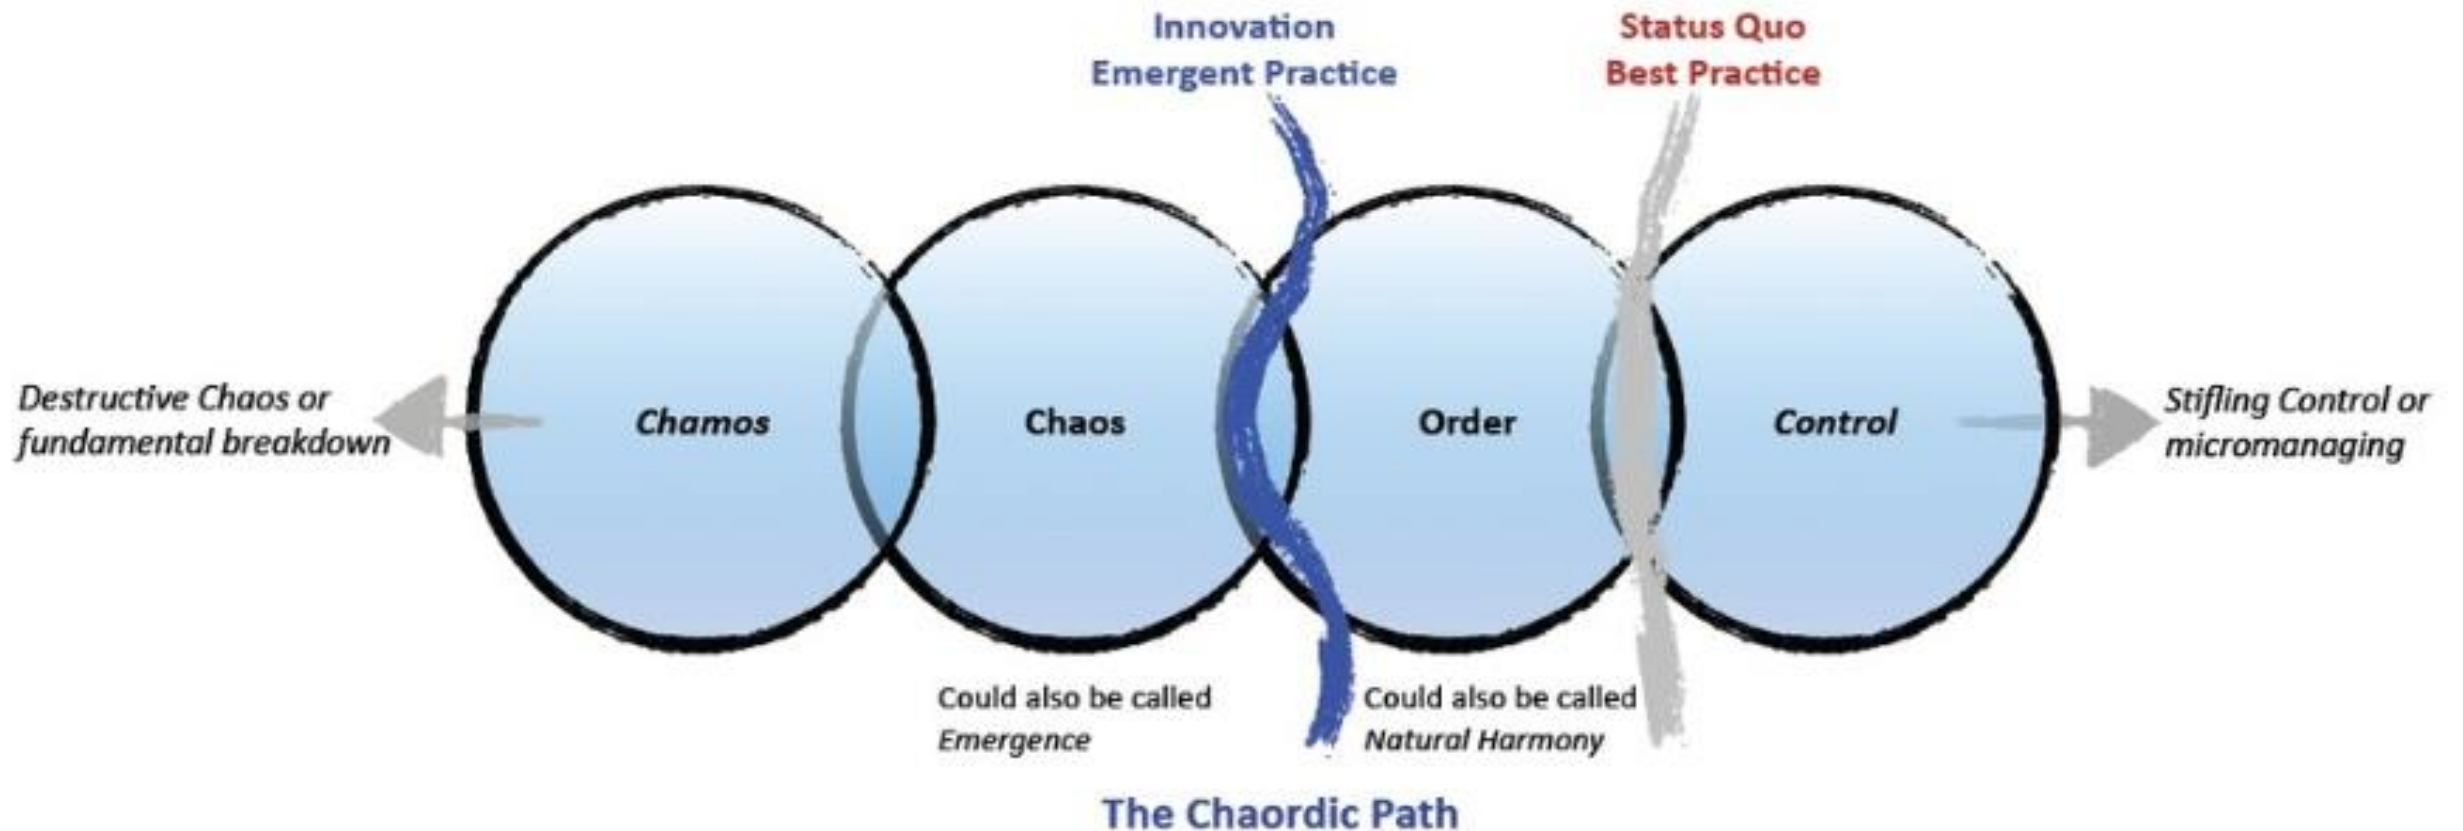

- 1. Enable & support collective self efficacy
- 2. Understand and share power and responsibility

Disaster Recovery

DISASTER RECOVERY

is part of emergency management, which includes the broader components of prevention, preparedness and response. Planning for recovery is integral to emergency preparation and mitigation actions may often be initiated as part of recovery.

DISASTER RECOVERY

includes built, environmental and economic elements, as well as social wellbeing. Recovery can provide an opportunity to improve these aspects beyond previous conditions, by enhancing social and natural environments, infrastructure and economies – contributing to a more resilient community.

SUCCESSFUL RECOVERY

Understand the context

Successful recovery is based on an understanding of the community context, with each community having its own history, values and dynamics.

Recognise complexity

Successful recovery is responsive to the complex and dynamic nature of both emergencies and the community.

Use community-led approaches

Successful recovery is community-centred, responsive and flexible, engaging with community and supporting them to move forward.

Coordinate all activities

Successful recovery requires a planned, coordinated and adaptive approach, between community and partner agencies, based on continuing assessment of impacts and needs.

Communicate effectively

Successful recovery is built on effective communication between the affected community and other partners.

Recognise and build capacity

Successful recovery recognises, supports and builds on individual, community and organisational capacity and resilience.

Understand the CONTEXT

Successful recovery is based on an understanding of the community context, with each community having its own history, values and dynamics.

Recovery should:

- Acknowledge existing strengths and capacity, including past experiences;
- Appreciate the risks and assessors faced by the community;
- Be respectful of and sensitive to the culture and diversity of the community;
- Support those who may be vulnerable;
- Recognise the importance of environment to people in their recovery;
- Be acknowledged as a long term effort as needed by the community; and
- Recognise that the boundaries of the community extend beyond the physical boundaries of the disaster occurred.

Recovery should:

- Be respectful of and sensitive to the culture and diversity of the community;
- Support those who may be vulnerable;
- Recognise the importance of environment to people in their recovery;
- Be acknowledged as a long term effort as needed by the community; and
- Recognise that the boundaries of the community extend beyond the physical boundaries of the disaster occurred.

Recovery should:

- Be respectful of and sensitive to the culture and diversity of the community;
- Support those who may be vulnerable;
- Recognise the importance of environment to people in their recovery;
- Be acknowledged as a long term effort as needed by the community; and
- Recognise that the boundaries of the community extend beyond the physical boundaries of the disaster occurred.

Recognise COMPLEXITY

Successful recovery is responsive to the complex and dynamic nature of both emergencies and the community.

Recovery should recognise that:

- Disasters lead to a range of effects and impacts that require a variety of approaches; they can also leave long-term legacies;
- Information on impacts is limited at first and changes over time;
- Affected individuals and the community have diverse needs, wants and expectations, which can evolve rapidly;
- Responsive and flexible action is crucial to address immediate needs;
- Existing community knowledge and values may challenge the assumptions of those outside of the community;
- Conflicting knowledge, values and priorities among individuals, the community and organisations may create tensions;
- Emergencies create stressful environments where grief or blame may also affect those involved; and
- Over time, appropriate support for individuals and communities, from within and outside, can cultivate resilience and build capacity.

Recovery should:

- Be respectful of and sensitive to the culture and diversity of the community;
- Support those who may be vulnerable;
- Recognise the importance of environment to people in their recovery;
- Be acknowledged as a long term effort as needed by the community; and
- Recognise that the boundaries of the community extend beyond the physical boundaries of the disaster occurred.

Recovery should:

- Be respectful of and sensitive to the culture and diversity of the community;
- Support those who may be vulnerable;
- Recognise the importance of environment to people in their recovery;
- Be acknowledged as a long term effort as needed by the community; and
- Recognise that the boundaries of the community extend beyond the physical boundaries of the disaster occurred.

Use COMMUNITY-LED approaches

Successful recovery is community-centred, responsive and flexible, engaging with community and supporting them to move forward.

Recovery should:

- Assist and enable individuals, families and the community to actively participate in their own recovery;
- Recognise that individuals and the community may need different levels of support at various times;
- Be guided by the community's priorities;
- Channel effort through pre-identified and existing community assets, including local knowledge, existing community strengths and resilience;
- Build collaborative partnerships between the community and those involved in the recovery process;
- Recognise that new community leaders often emerge during and after a disaster, who may not hold formal positions of authority; and
- Recognise that different communities may choose different paths to recovery.

Recovery should:

- Assist and enable individuals, families and the community to actively participate in their own recovery;
- Recognise that individuals and the community may need different levels of support at various times;
- Be guided by the community's priorities;
- Channel effort through pre-identified and existing community assets, including local knowledge, existing community strengths and resilience;
- Build collaborative partnerships between the community and those involved in the recovery process;
- Recognise that new community leaders often emerge during and after a disaster, who may not hold formal positions of authority; and
- Recognise that different communities may choose different paths to recovery.

- Build collaborative partnerships between the community and those involved in the recovery process;
- Recognise that new community leaders often emerge during and after a disaster, who may not hold formal positions of authority; and
- Recognise that different communities may choose different paths to recovery.

COORDINATE all activities

Successful recovery requires a planned, coordinated and adaptive approach, between community and partner agencies, based on continuing assessment of impacts and need.

Recovery should:

- Have clearly articulated and shared goals based on desired outcomes;
- Be flexible, taking into account changes in community needs or stakeholder expectations;
- Be guided by those with experience and expertise, using skilled, authentic and capable community leadership;
- Be at the pace desired by the community, and seek to collaborate and reconcile different interests and time frames;
- Reflect well-developed community planning and information gathering before, during and after a disaster;
- Have clear decision-making and reporting structures and sound governance, which are transparent and accessible to the community;
- Demonstrate an understanding of the roles, responsibilities and authority of organisations involved and coordinate across agencies to ensure minimal service provision disruption;
- Be part of an emergency management plan.

Recovery should:

- Have clearly articulated and shared goals based on desired outcomes;

- Demonstrate an understanding of the roles, responsibilities and authority of organisations involved and coordinate across agencies to ensure minimal service provision disruption;
- Be part of an emergency management plan.

COMMUNICATE effectively

Successful recovery is built on effective communication between the affected community and other partners.

Recovery should:

- Recognise that communication should be two-way, and that input and feedback should be encouraged;
- Ensure that information is accessible to audiences in diverse situations, addressing a variety of communication needs, and is provided through a range of media and networks;
- Establish mechanisms for coordinated and consistent communications between all service providers, organisations and individuals and the community;
- Ensure that all communication is relevant, timely, clear, accurate, targeted, credible and consistent; and
- Identify trusted sources of information and repeat key recovery messages to enable greater community confidence and receptivity.

Recovery should:

- Recognise that communication should be two-way, and that input and feedback should be encouraged;
- Ensure that information is accessible to audiences in diverse situations, addressing a variety of communication needs, and is provided through a range of media and networks;

Second presenter: Margaret Darveniza

Margaret Darveniza is the Team Manager of Community Engagement at Townsville City Council. She has worked in the area of disaster recovery and community development for many years in a number of locations across Queensland.

She has worked in disaster recovery for the Cassowary Coast and community development in Far North Queensland, Gympie and through contract work into communities all over Queensland.

Her experience in recovery is both from the perspective of a community leader in a voluntary capacity as well as working for government and other agencies.

Supporting Community Led Recovery – The Townsville Experience

Acknowledge and build capacity

Successful recovery recognises, supports and builds on individual, community and organisational capacity and resilience

G'DAY NEIGHBOUR!

IN AN EMERGENCY OR DISASTER, I CAN HELP OUT WITH MORE THAN JUST a cup of sugar...

Australian Government
Queensland Government
City of Townsville

BEFORE, DURING AND AFTER AN EMERGENCY OR DISASTER, I CAN HELP YOU BY:

- Looking after pets
- Feeding your livestock
- Keeping an eye on your property
- Moving items in your yard to safety
- Cleaning up
- Providing meals
- Letting you know about emergency warnings

Other: _____

AS LONG AS IT IS SAFE TO DO SO,

My details are...

Name: _____

Phone: _____

IF I'M NOT AT HOME AND YOU CAN'T CONTACT ME, I WOULD BE GRATEFUL IF YOU COULD:

- Check on my pets
- Move outdoor items to safety
- Cut fences/open gates if my stock is in danger

Other: _____

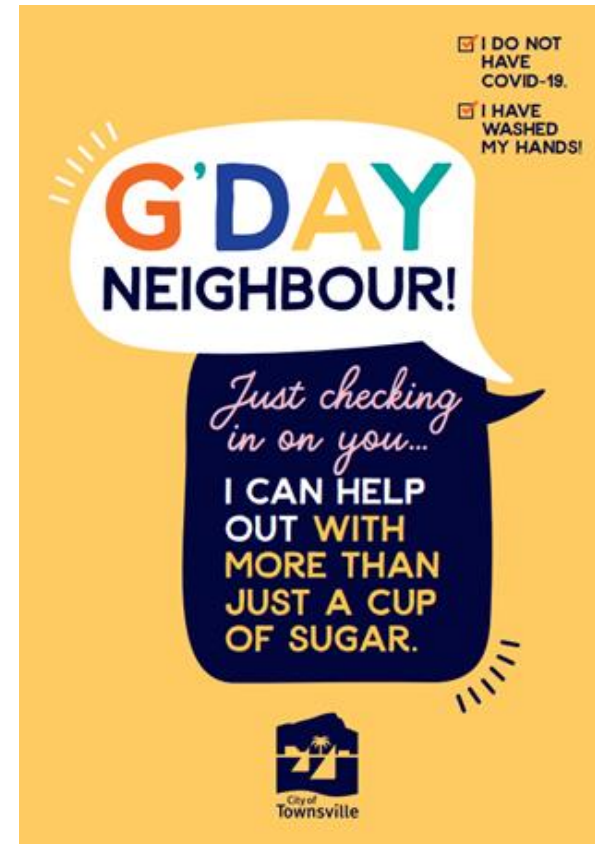

AS LONG AS IT IS SAFE TO DO SO,

Email: _____

Address: _____

disaster.townsville.qld.gov.au

Although funding for this product has been provided by both the Australian and Queensland Governments, the material contained herein does not necessarily represent the views of either Government.

G'DAY NEIGHBOUR!

Just checking in on you... I CAN HELP OUT WITH MORE THAN JUST A CUP OF SUGAR.

I DO NOT HAVE COVID-19.
 I HAVE WASHED MY HANDS!

HELLO! PLEASE FEEL FREE TO REACH OUT TO ME...

My name is _____

I live at _____

Call me on _____

I CAN HELP YOU WITH:

- Picking up groceries/medication
- A friendly phone call
- Sending mail
- Urgent supplies
- Dog walking
- Taking your animal to the vet (if safe to do so)

Other: _____

PLEASE CALL OR TEXT ME AND I'LL DO MY BEST TO HELP YOU (FOR FREE!)

City of Townsville

4 things you can do TO MAKE A POSITIVE DIFFERENCE IN OUR COMMUNITY...

Think of others, consider your actions and show compassion - **be kind**

Check on your neighbours - **give them a call**

Support vulnerable or isolated people

Share only accurate information and advice from trusted sources

Coronavirus is contagious.

Remember to:

- Wash your hands regularly for 20 seconds with soap and water.
- Use hand sanitizer in between hand washing.
- Avoid touching your face, nose and mouth.
- Keep a 1.5m distance from others.
