**OUR JOURNEY**

**DEEP DIVES**  
 WHERE WE ARE NOW

- Topic #1: How might we expand the range of values considered in decision making & learning?
- Topic #2: How might we connect the complexity of disaster risk reduction with how people perceive risks and make decisions?
- Topic #3: How might we account for the real costs of risk in # systems and incentivise opportunities for risk reduction

**Plenary Highlights**

WE ARE A COUNTRY OF NATIONS

First Nations knowledge should be elevated, even above Western Science because it's been here for +60,000 YEARS!

The Beginning of Social Change is understanding who we are, Caring for Country, built into law... it's going to take time.

Privileging Indigenous Voice means placing it first so it's considered.

"Nothing about us without us." There is a lot of synergies between Cultural Recognition and mitigation and adaptation.
